On the next page, keep track of feeding, growth and training of your project animal. List the type(s) of feed in the appropriate column - for example, hay, alfalfa, grain, etc. Record the growth of your project animal once a month in pounds or tape measurements, if appropriate for your animal species. Or comment of the animal's condition, using short phrases like "in peak performance", "too thin" or "too much condition (fat)".

Comment on your management decisions. What were the results of some management practices you followed? What changes did you make or will you make in the future?
